EDUCATION

M.Sc. Mathematical Engineering & Computational Science

Chalmers University of Technology

2024 Aug – Present

Gothenburg, Sweden

B.Sc. Software Engineering with Mathematics

Chalmers University of Technology

2021 Aug – 2024 Jun

Gothenburg, Sweden

EXPERIENCE

Software Engineer

Centiro

2025 Jun – 2026 Jun

Gothenburg/Borås, Sweden

- Developed C#/.NET integrations between enterprise delivery systems/3PLs and [Centiro's](#) logistics SaaS.
- Converted from full-time summer intern to part-time (20%) during studies. Offer extended to ~1.5% of applicants.

Data Science / ML project

AstraZeneca

2025 Nov - 2026 Jan

Gothenburg, Sweden

- Performed anomaly detection in continuous direct compression (CDC) medicine manufacturing using Autoencoder (VAE, RVAE, DVAE) based models.

Research Assistant

Chalmers University of Technology

2024 Dec – 2025 Sep

Gothenburg, Sweden

- Investigated causal structures in generative neural networks (GAN, diffusion and flow matching models) in collaboration with [Moritz Schauer](#) and (also funded by) [Richard Torkar](#).
- Received computing resources from [NAISS](#).

Bachelor Thesis

Chalmers University of Technology

2024 Dec - 2024 Jun

Gothenburg, Sweden

- Designed a theoretical model using iterated Gaussian noise to quantify uncertainty and improve neural-network prediction accuracy in computer-vision tasks under guidance of [Moritz Schauer](#).

Speaker

Chalmers IT Recruitment Group

2023 Jun – 2024 Aug

Gothenburg, Sweden

- Managed coding workshops on computer concepts, algorithms and neural networks for high-school students.
- Delivered talks to > 100 students regarding the education at Chalmers.

Teaching Assistant, Fundamental Computer Science

Chalmers University of Technology

2023 Aug - 2023 Oct

Gothenburg, Sweden

- Led coding tutorials and graded/guided labs for ~120 students.

PROJECTS

Educational Tools (Master's Course)

2024 Aug – Present

- Developed flashcard tool adopted by Chalmers' Nonlinear Optimization course (on course website).

gustavgille.com

2024 Jun – Present

- Deployed a VPS in Germany with HTTPS/SSL and custom domain.
- Built site with JavaScript, HTML, and CSS.
- Implemented Fourier-series approximation to model dynamic weight removal from a beam. Interactive demo on website.

TECHNICAL SKILLS

Languages: Python, C#, SQL, MATLAB, JavaScript, TypeScript, Java, C, Slurm.

Mathematics/Modeling: Stochastic Calculus/processes, Optimization, Dynamical Systems, FEM, bayesian inference.

Misc: Terminal, Git, Linux, SSH, VPS, Agile, APIs, GitHub, Azure.

Libraries/Frameworks: PyTorch, NumPy, Matplotlib, ODE/PDE solvers, HTML/CSS, Angular.
